DETAILED ACTION

This action is in response to an after-final amendment filed 11/2/06. The amendment has been entered.

Upon further review of the instant claims and specification it is apparent that the application is not in condition for allowance. Therefore, prosecution is reopened. As new grounds are presented in this action that are not necessitated by applicant's amendment of the claims, this action is non-final.

This application is in condition for allowance except for the following formal matters:

Claims 6 and 7 are objected to under 37 CFR 1.75 as being a substantial duplicate of claim 1. When two claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim. See MPEP § 706.03(k). The recitation that the TIM and TAM comprises a sequence having SEQ ID NO:1 or SEQ ID NO:2 of "signature sequences statistically identified as present within 100 nucleotides upstream of the transcription initiation site in natural promoters in plants" does not alter the identify of the sequences. Rather, this describes that where the sequences were found to be in the plant genes.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
